

AI-Assisted Pancreatic Cancer Analysis Report

PancreasAI Research Lab

Patient ID:	8FA66CDD-174	Date:	2026-07-14
Analysis ID:	8fa66cdd	Time:	22:13:42
Report Type:	AI-Assisted Screening	Mode:	Clinical

PREDICTION RESULT

Pancreatic Cancer

Metric	Value
Cancer Probability	80.65%
Confidence	80.65%
Risk Level	High

TUMOR ANALYSIS

Parameter	Value
Tumor Area	0.0 cm ²
Estimated Volume	0.0 cc
Location	N/A
Stage Suggestion	Possible Early Stage (T1) — Small lesion detected
Inference Time	90.717 seconds
GPU Status	CPU Only

EVALUATION METRICS

Metric	Score
Dice Coefficient (DSC)	1.0000
Intersection over Union (IoU)	1.0000
Hausdorff Distance 95% (HD95)	0.0000
Precision	1.0000
Recall	1.0000
F1 Score	1.0000
Sensitivity	1.0000

Specificity	1.0000
Accuracy	1.0000
Avg. Surface Distance (ASD)	0.0000
Volume Similarity (VS)	1.0000

VISUALIZATION

Grad-CAM Heatmap

Segmentation Overlay

CLINICAL SUMMARY

AI-ASSISTED ANALYSIS SUMMARY

WARNING: LOW-CONFIDENCE PREDICTION DETECTED

Validation Status: Multiple disconnected components detected for the pancreas (low confidence).

The safety validation layer rejected this prediction because the segmented structures did not satisfy clinical criteria (e.g. area size bounds or multiple disconnected segments). Therefore, the segmentation masks and overlays have been suppressed for safety.

RECOMMENDATION: Verify that the uploaded image is a valid abdominal CT scan slice containing the pancreas. Manual radiologist correlation is strongly advised.

PHYSICIAN NOTES

DISCLAIMER: This report was generated by an AI system for research and educational purposes only. It is NOT a certified medical diagnosis. All findings must be reviewed and validated by a qualified healthcare professional before any clinical decisions are made.
